Ms Marie Lorenzo - Office of the Ontario Minister of Health

Thanks for your time discussing alleged abuse by physicians of persons disabled by environmental sensitivities. It would be nice if the Minister cared to protect us from being abused. Leadership in our community quite regularly receive calls from people who are suicidal as a result of being abused by physicians. The abuse was documented in the Thomson report in 1985, and has been decried by many current cabinet ministers before they were responsible to deal with it. Perhaps you would support our efforts to heal by helping us set up a consumer controlled commission to travel and listen to our people who've been abused by physicians. We do not want to deal with a self-regulating body which itself has abandoned us to the abusers. - Chris Brown
